

Traffic Lights 1

19/4/19

This program turns on a Red light for five seconds, then turns on a green light for 5 seconds and finally turns on a Yellow light for 2 seconds before starting over again.

"On" = HIGH or 1

"Off" = LOW or 0

setup

This part tells the electronic brain what is attached to it.

It only reads this once.

loop

This part tells the electronic brain what to do with all the things attached to it.

At the end of the loop it goes back to the start of the loop and reads them all again, and again, and again.....
